

AHP HEATERS

The 'AHP' series of indirect heat exchangers are designed for commercial air heating applications. The robust construction of the units makes them an ideal heat source for shopping centres and commercial premises. AHP heaters are usually fitted with a high temperature limit thermostat or thermocouple unit, in order to protect the heat exchanger from excessive overheat.

Typical Applications

- Air replacement for commercial properties
- Air replacement for spray booths

Technical Features

- Capacity : 60kW to 1200kw are available; special units to meet the requirements of a particular application can be supplied.
- Fuel Types : Natural gas , LPG , Light fuel oils
