

# PCF BURNER

The 'PCF' series of burners are packaged units designed to suit virtually all types of industrial gas fired applications. The robustness and flexibility of the burners allow them to be used in many industries including food, automotive, aerospace, materials finishing, minerals processing and ceramic drying.

## Typical Applications

- Industrial Dryers
- Industrial Ovens

## Technical Feature

- Turndown Ratio : 30:1
- Capacity : 1750kW to 14,000kW
- Fuel Types : Suitable for operation on most gaseous fuels.
