

TFR-HT BURNER

The 'TFR-HT' burner series of packaged gas burners have been specifically designed for the firing of high-temperature ovens. They are intended for application where the high process temperature prohibits the use of standard PC burners or where high-velocity tempering air is required. The TFR-HT burners are suitable for oven temperatures up to 900°C.

Typical Applications

- High temperature ovens
- Tempering Furnaces
- Annealing Ovens

Technical Feature

- Turndown Ratio : 30:1
- Capacity : 50Kw to 1000Kw and available in on off, high low, and modulating gas only versions.
- Fuel Types : Natural gas , LPG
